

Swathi Anilkumar Sreelatha

Dubai, UAE | +91 8281126465 | swathianilkumarsreelatha@gmail.com | [LinkedIn](#) | [GitHub](#) | [Website](#)

Professional Summary

Data Analyst with **2 years of UK experience** delivering KPI reporting, dashboard development, and data-driven insights across operations and commercial functions. Proficient in SQL, Python, Power BI, Tableau, and advanced Excel for data modeling, ETL validation, and performance analytics. Completed 25+ professional certifications in SQL, Power BI, Excel, and data analysis, demonstrating continuous upskilling and technical depth. Proven track record of improving operational efficiency (10–20%), enhancing data accuracy, and building forecasting models with more than 90% accuracy. **Immediate joiner and open to relocation across the UAE.**

SKILLS

Programming & Automation: SQL, Python

Databases & Querying: SQL Server, APIs

BI & Visualization Tools: Power BI (Data Modeling, Power Query, Advanced DAX, Power BI Service), Excel, Tableau

Excel: INDEX-MATCH, LOOKUP functions, Advanced Functions, Pivot Tables

Other: Data Cleaning, Ad Hoc Analysis, Data Governance, Statistical Analysis, Forecasting & Predictive Modeling, Supervised and Unsupervised learning, Data manipulation

Python: pandas, NumPy, matplotlib, seaborn, K-Means

Soft Skills: Data Storytelling, Stakeholder Management, Problem Solving, Agile Methodologies

Languages: English (Fluent), Arabic (Basic)

EXPERIENCE

Data Officer

Mar 2025 - Jan 2026

[Unseen UK, United Kingdom](#)

- Implemented Microsoft Power Automate to securely automate BT Cloud report downloads to SharePoint, improving reporting speed by 20% and data accuracy by 10% while ensuring data confidentiality.
- Generated automated Salesforce dashboards, reducing manual reporting and accelerating monthly invoicing by 20%.
- Designed annual assessment templates using Power Query and Salesforce bulk object imports, standardizing 2025 assessment reporting and improving data consolidation.
- Delivered webinars, led case-review presentations, and initiated cross-functional meetings, contributing to a 20% increase in client retention.
- Troubleshoot Salesforce CTI implementation issues by creating logs and escalating them to managers, improving operational efficiency by 25%.
- Built complex Salesforce Lightning reports using joins across objects and responded to Salesforce Chatter discussions to ensure timely communication and faster decision-making.
- Trained and onboarded new colleagues on reporting systems, Salesforce workflows, and KPI tracking, improving team productivity.
- Extracted, cleaned, and validated Salesforce CRM data using Excel PivotTables and charts for ad-hoc, monthly, quarterly reports, reducing generation time by 40%.
- Audited helpline data and implemented validation rules and error messages in the CRM, enhancing data integrity and supporting continuous improvement with 30% fewer errors.

- Led a team of five analyzing Swift POS sales data to optimize workflows, boosting customer satisfaction by 10% across diverse events.
- Mapped operational workflows using sales reports to pinpoint bottlenecks, slashing event setup time by 18%.
- Produced KPI performance reports in Excel tracking event metrics, stock levels, and budgets for strategic planning.
- Collaborated with service owners using Swift POS insights to establish success metrics and continuous improvement frameworks.
- Analyzed daily Swift POS sales reports to eliminate dead stock, consistently meeting targets and enhancing profitability.
- Mentored staff on reporting, Swift POS analytics, and operational KPIs, fostering a results-driven multitasking culture.

EDUCATION

Master of Science in Data Analytics Aston University, United Kingdom	Sep 2022 - Sep 2023
Diploma in Computer Applications KELTRON, India	Jul 2021- Jan 2022
Master of Science in Physics Mahatma Gandhi University, India	Aug 2018 - Mar 2020

CERTIFICATION

Excel with Copilot: AI-Driven Data Analysis by LinkedIn Credential Link	Mar 2026
Tata - GenAI Powered Data Analytics Job Simulation Credential Link	Mar 2026
Excel Essential Training (Microsoft 365) by LinkedIn Credential Link	Feb 2023
MySQL for Advanced Analytics by LinkedIn Credential Link	Feb 2023
Power BI Data Visualization and Dashboard by LinkedIn Credential Link	Feb 2023

PROJECTS | [GitHub Portfolio](#)

Decoding Population Dynamics in India, China, the UK, the USA, & Brazil | Aston University | [Link](#)

- Performed exploratory data analysis in 20+ global datasets using advanced Excel techniques to identify population trends, growth rates, and demographic shifts.
- Applied statistical and machine learning models to forecast population trends, achieving approximately 90% prediction accuracy.
- Presented analytical findings through a structured PowerPoint report, translating complex data insights for client and stakeholder understanding.

Dubai Residential Property Price Analysis | [Link](#) Personal Project

- Explored 1,900+ Dubai property listings to investigate pricing disparities across neighborhoods and identify key market drivers.
- Performed EDA using Excel Pivot Tables, statistical functions, and lookups to detect abnormal pricing patterns.
- Created price-per-square-foot and neighborhood deviation metrics to identify overpriced and undervalued property segments.

Online Retail Revenue Analysis | [Link](#) Personal Project

- Identified AED 1.73M revenue leakage from a 69% funnel drop-off across 4,338 customers, delivering retention recommendations projected to recover 10% within a quarter.
- Built a demand forecasting model at 89% accuracy, predicting a 45% Q4 revenue spike and enabling pre-season inventory decisions to minimise stockout risk.
- Applied RFM and K-Means clustering to expose a 6.9x spend gap between customer tiers, directly informing targeted re-engagement and CRM prioritisation strategy.
- Consolidated Python, SQL, and Excel outputs into a live Power BI dashboard across 38 markets, surfacing an 84.6% revenue concentration risk and recommending GCC diversification opportunities.
